## Product Description

### Product Description

#### Brass Metal Turning CNC Milling Machine Lathe VMC Vertical Machining Center

The VMC is a versatile and precise tool that allows for the production of high-quality parts in a range of industries. It is an essential tool in modern manufacturing and is used by skilled machine operators to create intricate components from a variety of materials.

1.The base parts, carriages, worktables, columns, spindle boxes and other main parts are made of HT300 cast iron; the base is box-type structure, and the compact and reasonable symmetric rib structure ensures the high rigidity and bending resistance of the base parts. A-type bridge struts and internal grid-like ribs strongly guarantee the rigidity and precision of Z-axis strong cutting; the basic parts are made of resin sand and treated with aging to ensure the stability of the long-term use performance of the machine tool.

2.X, Y, Z three-way guide rails are Taiwan's ball linear guides, with high speed, high rigidity, low friction, low noise, low temperature changes and other characteristics, with automatic forced lubrication, improve machine tool accuracy life.
