Product Introduction:

This machine tool is mainly responsible for various turning tasks. It can turn the end faces, outer circles, inner holes, metric threads, inch threads, module threads, and diametral pitch threads of various parts. The upper tool holder can be used to shorten the taper of a single motor vehicle, and the upper tool holder can also be fed longitudinally in conjunction with the motor vehicle to lengthen the taper. In addition, it can also undertake drilling, boring and other processes. The machine tool has high power, high speed, and strong rigidity.

Our CW Heavy Duty Lathe Machine is the upgraded version of our heavy horizontal lathe. With years of production experience, advanced design methods, and cutting-edge manufacturing technology, it meets the latest national precision standards. This machine combines electrical, automatic control, hydraulic control, and modern mechanical designs to deliver precise manufacturing in various disciplines. Suitable for a Wide Range of Materials and Sizes

The CW61100, CW61125, and CW61160 heavy duty lathes are perfect for turning both cast iron and steel workpieces, as well as non-ferrous metal parts of medium to large sizes. You can easily perform external cylindrical surface turning, inner hole and end face turning. Plus, it effortlessly handles internal and external metric, inch, module, and diametrical pitch threads. The top slide can also be used independently for turning short tapers.

Unmatched Power, Rigidity, and Speed Range

Our lathes are designed for high-speed and heavy-duty turning. They boast impressive power, rigidity, and a wide range of rotating speeds. Whether you need to work at high speeds or apply strong forces, our CW Heavy Duty Lathe can handle it all.
