Product Introduction:

This machine tool is mainly responsible for various turning tasks. It can turn the end faces, outer circles, inner holes, metric threads, inch threads, module threads, and diametral pitch threads of various parts. The upper tool holder can be used to shorten the taper of a single motor vehicle, and the upper tool holder can also be fed longitudinally in conjunction with the motor vehicle to lengthen the taper. In addition, it can also undertake drilling, boring and other processes. The machine tool has high power, high speed, and strong rigidity.

Experience the ultimate turning performance with our CW Heavy Duty Lathe Machine.

- Ideal for turning lengthy workpieces
- Bedways surface treated with supersonic frequency hardening
