Product Description

Cw61100 Cw61125b Chinese Big Bore Heavy Duty Lathe Machine 6/7/8 Meters Lathe

Product Introduction:

Introducing our advanced heavy-duty horizontal lathe machines, designed with cutting-edge technology to meet the highest precision standards. These machines integrate electrical, automatic control, hydraulic control, and modern mechanical designs, combining multiple disciplines of precision manufacturing.

Our CW6150, CW6163, CW61100, CW61125, and CW61160 heavy-duty lathes are perfect for turning and machining cast iron, steel, and medium to large non-ferrous metal parts. They excel in external cylindrical surface turning, internal hole and end face turning, and various thread types including metric, inch, module, and diametrical pitch. The top slide allows for precise turning of short tapers. With their exceptional power, rigidity, and a wide range of rotating speeds, these lathes are ideal for high-speed and strong force turning operations.

- Ideal for turning lengthy workpieces
- Bedways surface treated with supersonic frequency hardening
- High rigidity and accuracy in the spindle system
- Headstock equipped with clutch for enhanced safety and reliability
- X and Z axis with centralized ballscrew
- Features a centralized lubrication system
