

250mm Bed Width CNC Vertical Lathe Machine For Precise Turning Up To 2000mm In Height

Basic Information

Place of Origin: Henan, China

Brand Name: BAISHUN MACHINERY

• Certification: ISO

• Model Number: CK5112

Minimum Order 1 set

Quantity:

• Price:

Negotiation

Packaging Details: Export standard wooden case package or

Negotiation with customers

• Delivery Time: 45 work days

Payment Terms: T/T, L/C, Western Union
Supply Ability: 50 Set/Sets per Month

Product Specification

Width Of Bed (mm): 250 MmNo. Of Spindles: Twin

Max. Length Of 2500

Workpiece (mm):

• Dimension(L*W*H): 6150*4400*5330mm

• Spindle Motor 55

Power(kW):

• Tool Post Stations: 4

Max. Height Of Wok 2000mm

Piece:

• Number Of Axes: 2

• Highlight: 2000mm Height CNC Vertical Lathe Machine,

Precise Turning CNC Vertical Lathe Machine

Product Description:

The CNC Vertical Lathe Machine boasts a travel (X Axis) of 1900mm, allowing you to machine large workpieces with precision and ease. The positioning accuracy of the machine is ±0.005mm, ensuring that your finished product meets all your exact specifications. This makes it an ideal machine for precision engineering and other applications where accuracy is crucial.

The machine also comes equipped with a lathe tool post, which adds to its versatility. This feature allows you to change tools quickly and easily, making it an excellent choice for a variety of machining tasks. The vertical lathe machine has a turning capacity of up to 2500mm, making it ideal for working on large parts.

The CNC turning lathe machine is equipped with state-of-the-art technology that makes it easy to operate and maintain. It has a user-friendly interface that allows you to quickly and easily program the machine to perform a wide range of tasks. The machine is also designed for easy maintenance, with simple and accessible components that can be easily replaced when necessary.

In conclusion, the CNC Vertical Lathe Machine is an excellent choice for any metalworking application. Its high precision, versatility, and user-friendly interface make it an ideal machine for a wide range of tasks. Whether you need to machine large parts or perform precision engineering, this machine is sure to deliver excellent results every time.

Features:

Product Name: CNC Vertical Lathe Machine

Machining Capacity: Medium Duty

No. Of Spindles: Twin

Max.turning Diameter: 3500mm

Spindle Bore(mm): 105

Dimension(L*W*H): 6150*4400*5330mm

This CNC Vertical Lathe Machine is an ideal lathe machine for metal with a medium duty machining capacity. It features twin spindles, a max turning diameter of 3500mm, and a spindle bore of 105mm. With its dimension of 6150mm in length, 4400mm in width, and 5330mm in height, this CNC lathe machine is equipped with a lathe tool post that can handle various metal machining tasks with precision.

Technical Parameters:

Product Category	CNC Vertical Lathe Machine
Width Of Bed (mm)	250 Mm
Travel (X Axis)(mm)	1900 Mm
Max. Spindle Speed (r.p.m)	90 R.p.m
Tool Post Stations	4
Positioning Accuracy (mm)	±0.005
Max. Length Of Workpiece (mm)	2500
Repeatability (X/Y/Z) (mm)	±0.003
Machining Capacity	Medium Duty
Max.turning Diameter	3500mm

Applications:

The CNC Vertical Lathe Machine is ISO certified, ensuring that the machine is of high quality and meets international standards. The machine's repeatability (X/Y/Z) (mm) is ± 0.003 , making it highly accurate. The spindle bore (mm) is 105, and the width of the bed (mm) is 250 mm. These features make the machine suitable for medium-duty machining capacity.

The CNC Vertical Lathe Machine is suitable for a variety of product application occasions and scenarios. It is commonly used in the aerospace, automotive, and machinery industries. It is ideal for turning complex and high-precision parts, such as turbine blades, bearing rings, and shafts. The machine is also used for grinding, drilling, and milling operations, making it a versatile tool for any workshop. The machine is equipped with a lathe tool post that allows for easy and quick tool changes, reducing downtime and improving productivity. The CNC Vertical Lathe Machine is a CNC metal lathe that is easy to operate and can be customized to meet specific customer requirements. The machine runs on a voltage of 380V, ensuring that it can be used in most industrial settings.

Support and Services:

Our CNC Vertical Lathe Machine product comes with comprehensive technical support and services that include: Installation and setup of the machine

Training for operators and maintenance personnel

24/7 technical support to address any issues or concerns

Regular maintenance and inspection services to ensure optimal performance

Repair and replacement services for any faulty components or parts

We are committed to providing exceptional customer service and support to ensure that our customers are satisfied with their purchase and experience with our product.

Packing and Shipping:

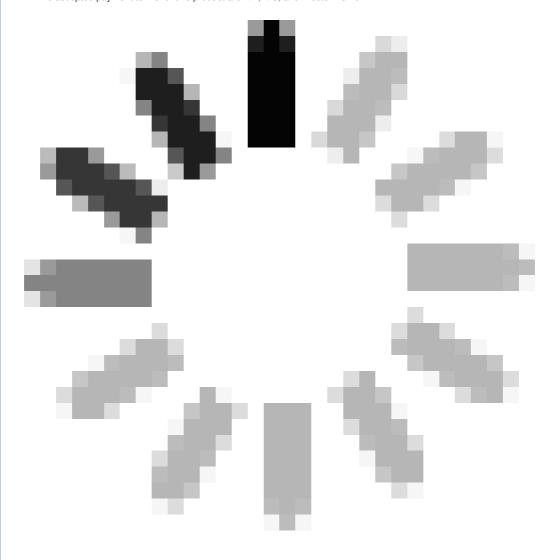

Product Packaging:

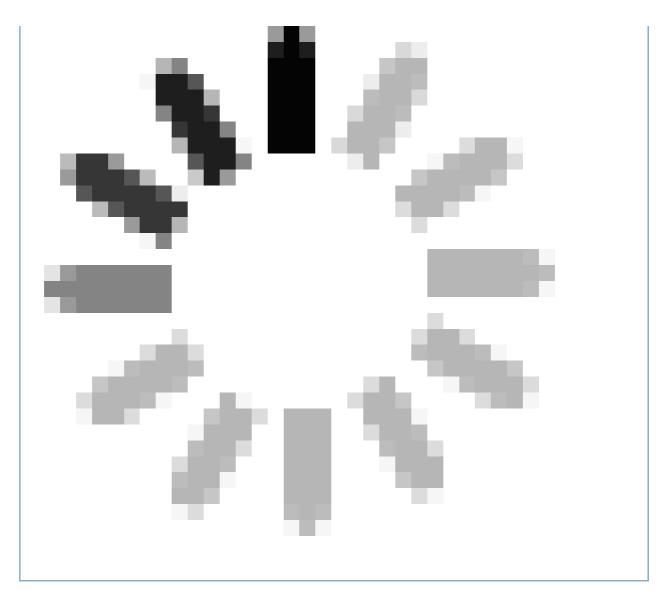

The CNC Vertical Lathe Machine will be securely packaged in a wooden crate with foam padding to protect it during transportation. The crate will have handles for easy lifting and will be sealed with screws to prevent tampering.

The CNC Vertical Lathe Machine will be shipped via a reliable freight carrier to ensure timely and safe delivery. The shipping cost will be calculated based on the destination and weight of the machine. The customer will be notified of the tracking number once the machine has been shipped.

FAQ:

- Q: What is the brand name of this CNC Vertical Lathe Machine?
- A: The brand name of this machine is BAISHUN MACHINERY.
- Q: What is the model number of this machine?
- A: The model number of this machine is CK5112.
- Q: Where is this machine manufactured?
- A: This machine is manufactured in Henan, China.
- Q: What is the minimum order quantity for this machine?
- A: The minimum order quantity for this machine is 1 set.
- Q: What are the payment terms accepted for this product?
- A: The accepted payment terms for this product are T/T, L/C, and Western Union.
