Product Description

Used Cnc Single Column Vertical Turret Lathe Cheap Cnc Machine Lathe Gsk System

Use range of CK5120

CNC single column vertical lathe is suitable to process ferrous metal, nonferrous metals and partial non-metallic material, and could achieve the processing of turning of the end face, inside and outside cylindrical surface, inside and outside circular conical surface and drilling, expanding, reaming of hole. Main transmission is driven by the spindle AC servo motor, hydraulic gear change and two gears stepless speed regulation. Worktable is manual 4-jaw single movement chuck.

Technical Introduction:

1. Suitable for mechanical processing industries, this vertical lathe can handle both internal and external cylinders, cone surfaces, and face cutting, accommodating both coarse and fine turning processes.
2. The workbench utilizes a hydrostatic guideway, and the main shaft employs high-precision NN30 type (D) double row cylindrical roller bearings, ensuring high load capacity and rotational precision. The machine's electrical components are sourced from reputable domestic brands, guaranteeing high reliability.
3. Manufactured using advanced EPC processes and high-quality materials, the machine undergoes annealing and aging treatments. This results in an attractive appearance, durability, excellent user-friendliness, and convenient operation and maintenance.
