## Product Description

### CK5117 CNC Single Column Vertical Turret Lathe Cast Iron Metal Cutting Machine

Our hot selling CNC Vertical Turning Lathe is perfect for processing ferrous metals, nonferrous metals, and some non-metallic materials. It can handle tasks such as turning end faces, inner and outer cylindrical surfaces, inner and outer circular conical surfaces, as well as hole drilling, expanding, and reaming. The main transmission is driven by an AC servo motor, and the machine offers hydraulic gear shifting and stepless speed regulation with two gears. The worktable is equipped with a manual 4-jaw single movement chuck for easy operation.

#### Main Features:

- 1). It is mostly used to process middle-diameter tire mould and flanges, various valves and pipelines, pressure vessels, screw propeller, steamer machine accessories, plastic mould, shafts and other work-piece.
- 2). It is suitable for processing the internal/external cylindrical surface, conical surface, end face etc
- 3). Spindle bearings use domestic famous-brand company products.
- 4). Head stock takes symmetrical structure to make thermal deformation be even, avoiding the spindle center generates offsets.
- 5). Gears in head stock and guide way are processed by quenching to ensure accurate transmission and high rigidity.
- 6). Vertical lathe table inlays with zinc alloy wear-resistant guide guard and can access pressure oil (0.2-0.4MPa) between the rails for improving load-carrying ability of workbench.
