China Hot sale Multi-purpose CNC Vertical Turning Lathe is suitable to process ferrous metal, nonferrous metals and partial non-metallic material, and could achieve the processing of turning of the end face, inside and outside cylindrical surface, inside and outside circular conical surface and drilling, expanding, reaming of hole. Main transmission is driven by the spindle AC servo motor, hydraulic gear change and two gears step less speed regulation. Worktable is manual 4-jaw single movement chuck.

Tool Holder:

The default tool post is a four-position electric tool post, which is selected from YANTAI Universal Brand and belongs to the best tool post supplier in China. Depending on the size of the machine tool, we also provide 6-position and 8-position tool post.

Chip Conveyor:

If machine has full cover, the Chip Conveyor should be choose. It is suitable for steel industry scrap (material) fast delivery. With special structure can be better suitable for the delivery of chips under bad working conditions, such as steel pipe industry wire machine produced by the long strip of large roll chip.
