Product Description

High Rigid Screw Threading Horizontal Pipe Cutting Lathe Big Hole Pipe Threading Lathe

Product Description:

CNC pipe threading machine is a high efficiency, high precision two coordinate continuous control CNC machine independently researched and developed according to the development needs of petroleum industry. The machine has high power, good rigidity, can cut straight, oblique, arc, male, inch thread, and has a variety of functions such as tip radius compensation. The machine features high rigidity and high power. It is a high precision and high efficiency pipe thread machining machine.

It can be used for rough machining and finishing machining of mechanical parts, especially suitable for petroleum, mining, machinery and other industries, for high-efficiency, high-volume and high-precision processing of rotary parts. And also can process steel, cast iron, non-ferrous metals and other materials. With mechanical and electrical integration design, advanced structure, reasonable layout, beautiful shape, the use of integral bed, good rigidity and stability; Machine automatic lubrication system.

Features:

1. Big spindle bore and double chuck to ensure process big diameter pipe.
2. One-piece bed adopts high strength casting iron to ensure rigidity and precision.
3. Ultrasonic frequency quenched guide-ways ensure good wear-resistance.
4. Surface of carriage and guide way with high accuracy.
